Objective

I am a committed Java Full Stack Developer with a strong focus on backend development. I rapidly acquire technical skills and am dedicated to continuous learning and improvement. My hands-on experience and comprehensive training enable me to excel in software development. I am dedicated to supporting team goals in a collaborative and innovative environment.

Experience

- **Mphasis**   **April 2023 - Present**
  Trainee Associate Software Engineer
  - Completed an intensive 6-month training program focused on full stack developmemt using Java, Spring Boot and MySQL.
  - Gained hands-on experience in developing web applications, designing Restful APIs for dynamic website.
  - Participated in collaborative projects, working in Agile teams to practice real- world application development and problem-solving.

Education

- **Jaigopal Garodia National Higher Secondary School**   **2016**
  Secondary School Leaving Certificate
  Finished my education with a percentage of 89.4%
- **Jaigopal Garodia National Higher Secondary School**   **2018**
  Higher Secondary Certificate
  Finished my education with a percentage of 76.8%
- **Dhanalakshmi College Of Engineering**   **2022**
  B.E. Computer Science Engineering
  I completed my B.E Computer Science Engineering with a CGPA of 8.48, first class and no history of arrears

Skills

- Core Java
- Spring Boot Framework
- Restful Webservices with Spring Boot
- Sql

Projects

- **Online Food Delivery System**

  Organization : Mphasis
  Duration : August 2023 to Sep 2023
  Environment : Java Foundation
  Description : Developed and deployed an Online Food Delivery System, a real-time web application allowing users to browse restaurants, select food items, place orders, and track delivery status. Implemented user-friendly interfaces for customers and restaurant partners.
  Responsibilities :
  - Designed and implemented core features such as admin authentication and update the food products based on cuisines.
  - Collaborated with frontend developers to ensure seamless integration of frontend and backend functionalities.
  - Conducted performance optimization and troubleshooting to enhance user experience and system reliability.
- **Hospital Management System Microservices**

  Organization : Mphasis
  Duration : Oct 2023 to Nov 2023
  Environment : Java Foundation
  Description : Contributed to the development of a comprehensive Hospital Management System, designed to streamline patient care, administrative tasks, and medical records management. Implemented robust functionalities to enhance operational efficiency and patient experience.
  Responsibilities :

- Developed the discharge patient service, including saving and retrieving patient details.
- Implemented a POST method for adding discharged patients to the system.
- Collaborated with teams to integrate and test the discharge service for reliability and compliance.

Interests

- I am seeking new career opportunities where my skills align with available roles, but I'm also open to switching to new technologies. I quickly acquire new skills and am eager to contribute to innovative projects, whether in my current field or a new domain.
